---

PROFILE

A junior frontend developer with 1+ years of experience developing within React and its ecosystem of tools/libraries. I am quickly gaining professional experience by working remotely with teams, organizations, and contributing to open-source projects. Currently pursuing a career change after falling in love with coding in late 2020, I have found that the skills, thought-processes, customer service, and management experience of the last 18 years of my career have already proven valuable. These soft skills combined with my determination, love of learning, openness for criticism, and experience working collaboratively with a team are going to allow me to surpass expectations and goals.

WORK EXPERIENCE

Code for Pdx | Frontend Developer
Organization building civic technology committed to improving public services in Portland
Apr. 2023 - Present
